Volume XLII

July 1985 to December 1985

Taylor & Francis
London and Philadelphia

Subscription Information

Published monthly Annual subscription 1986 £325 DM 1300 US $690 ISSN 0020–7179

Dollar rates apply to USA, Canada and Mexico. Deutschmark rates to FR Germany. Sterling rates apply to the UK and all other areas.

All subscriptions are payable in advance and all rates include postage. Journals are sent by air to the USA, Canada and Mexico, India and Australasia. Subscriptions are entered on an annual basis, i.e. from January to December. Payment may be made by sterling cheque, dollar cheque, international money order or National Giro, or by credit card (AMEX, VISA, Mastercard/Access).

Orders originating in the following territories should be sent direct to the local distributors:

Australia	R. Hill & Son Ltd, 117 Wellington Street, Windsor, Victoria 3181.
India	Universal Subscription Agency Pvt. Ltd, 101–102 Community Centre, Malviya Nagar Extn Post Bag No. 8, Saket, New Delhi 110017.
Japan	Kinokuniya Company Ltd, Journal Department, PO Box 55 Chitose, Tokyo 156.
New Zealand	R. Hill & Son Ltd, Private Bag, Newmarket, Auckland 1.
USA, Canada and Mexico	Taylor & Francis Inc., 242 Cherry Street, Philadelphia, Pennsylvania 19106–1906.
UK and all other territories	Taylor & Francis Ltd. Rankine Road. Basingstoke. Hampshire RG24 0PR.

Air freight and mailing in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. Second class postage paid at Jamaica, New York 11431. US Postmaster: Send address changes to *International Journal of Control*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003.

Published by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, UK. Printed by Taylor & Francis (Printers) Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR, UK.

CONTENTS OF VOLUME XLII

NUMBER 1—JULY

PAGE

Non-linear systems, stabilization, and coprimeness. J. HAMMER 1

Computation of branching solutions of a non-linear control system via dual-input describing function and root locus techniques H. HAHN 21

Stabilization of deterministic and stochastic-parameter discrete systems. E. YAZ 33

Spectral factor reduction by phase matching: the continuous-time single-input single-output case. P. HARSHAVARDHANA and E. A. JONCKHEERE 43

The Hankel operator and its induced norms. D. A. WILSON 65

On non-exact controllable systems H. R. HENRIQUEZ 71

On the accuracy achievable in least-squares dynamic system identification A. NIEDERLIŃSKI 85

A linear time-varying filter for estimating a signal from unknown noise and its application to identification R. DORAISWAMI and J. JIANG 97

Basic properties of q-dimensional linear digital systems. J. E. KUREK ... 119

Minimization of a quadratic cost functional for a class of single-input bilinear control systems. E. P. RYAN and N. J. BUCKINGHAM 129

Observers with several time scales for systems with several time scales. V. DRĂGAN 149

On the convergence of recursive algorithms with constant gain matrix used in adaptive systems. R. M. SALES 155

Discrete model-reference adaptive control using only input and output measurements. W. P. CHAN and C. C. HANG 161

A parameter optimization approach to the design of structurally constrained regulators for discrete-time systems. R. SCATTOLINI and N. SCHIAVONI 177

Adaptive controller design using disturbance-accommodation techniques C. D. JOHNSON 193

System analysis, parameter estimation and optimal regulator design of linear systems via Jacobi series. C.-C. LIU and Y.-P. SHIH 211

Double-shifted Chebyshev series for convolution integral and integral equations. J.-H. CHOU and I.-R. HORNG 225

Applications of shifted Chebyshev series to the optimal control of linear distributed-parameter systems. I.-R. HORNG and J.-H. CHOU 233

Application of discrete Chebyshev polynomials to the optimal control of digital systems. I.-R. HORNG and S.-J. HO 243

Some properties of the canonical parameter space. C. B. SOH, C. S. BERGER and K. P. DAEKE 251

PAGE

A non-linear programming approach to the computer-aided design of regulators using a linear–quadratic formulation. P. FLEMING 257

Correspondence

A simple and direct proof of a bound on the zeros of a polynomial. J. A. HEINEN 269

Corrigenda 271

NUMBER 2—AUGUST

Quantitative synthesis of uncertain cascaded multiple-input multiple-output feedback systems. I. HOROWITZ, L. NEUMANN and O. YANIV 273

Quantitative cascaded multiple-input multiple-output synthesis by an improved method. I. HOROWITZ and O. YANIV 305

On non-linear systems and algebraic geometry S. P. BANKS 333

Chaotic motion in an adaptive control system. F. R. RUBIO, J. ARACIL and E. F. CAMACHO 353

V-functions in the control of motion. E. A. GALPERIN and J. M. SKOWRONSKI ... 361

Balanced realizations via model operators. N. J. YOUNG 369

On the relationship between the Lagrange multiplier method and the two-filter smoother. K. WATANABE 391

Optimal boundary control of a tracking problem for a parabolic distributed parameter system. E. HUNTLEY 411

On the evaluation of expected performance cost for partially observed closed-loop stochastic systems. D. S. BAYARD and M. ESLAMI 433

Stability analysis of an optimal linear system with white coefficients: the influence of an incorrect covariance of the coefficients. T. ISHIHARA, K.-I. ABE and H. TAKEDA 449

Self-tuning filters and predictors for two-dimensional systems. Part 1: Algorithms. P. E. WELLSTEAD and J. R. CALDAS PINTO 457

Self-tuning filters and predictors for two-dimensional systems. Part 2: Smoothing applications. J. R. CALDAS PINTO and P. E. WELLSTEAD 479

Self-tuning filters and predictors for two-dimensional systems. Part 3: Prediction applications. J. R. CALDAS PINTO and P. E. WELLSTEAD 497

Discrete system models based on simple performance specifications in the time, frequency or complex *z*-domains. J. SHI and M. J. GIBBARD 517

A frequency response matching method for the design of digital controllers with constraints in the pole–zero locations. J. SHI and M. J. GIBBARD 529

Correspondence

Comments on 'On an estimate of the delay rate for stable linear delay systems'. A. HMAMED 539

Erratum 541

NUMBER 3—SEPTEMBER

PAGE

Pole assignment of strictly proper and proper linear systems by constant output feedback. C. GIANNAKOPOULOS and N. KARCANIAS 543

Linearity in the closed-loop characteristic polynomial. G. K. G. KOLKA 567

Necessary and sufficient stability criterion for systems with structured uncertainties: the major principal direction alignment principle. B. KOUVARITAKIS and H. LATCHMAN 575

Finite-time output stabilization for continuous-time systems with constant disturbances. T. KOBAYASHI 599

A Lur'e-type Lyapunov function for multi-machine power systems with transfer conductances. M. SAEKI, M. ARAKI and B. KONDO 607

A comparative study of the operational matrices of integration and differentiation for orthogonal polynomial series. P. D. SPARIS and S. G. MOUROUTSOS 621

The Arveson frequency response and systems theory. R. SAEKS and G. KNOWLES 639

Non-linear guidance laws for automatic orbital rendezvous. P. K. C. WANG 651

Comparison of the performance of a model-reference adaptive system and a classical linear control system under non-ideal conditions. P. T. KIDD 671

Matched processors for quantized control: A practical parallel-processing approach. E. H. FERIA 695

The transient stabilization of a synchronous machine using variable-structure systems theory. K. S. M. PANICKER, S. I. AHSON and C. M. BHATIA 715

Computation of the state transition matrix for a class of delay-differential systems. S. H. ŻAK and M. BUSLOWICZ 725

Null-controllability of non-linear infinite delay systems with restrained controls. A. S. C. SINHA 735

Identification and control of non-stationary delayed systems using state-affine representation. D. THOMASSET and B. NEYRAN 743

NUMBER 4—OCTOBER

Time-varying linear systems and invariants of system equivalence. A. ILCHMANN 759

Optimal control of jump-linear gaussian systems. B. E. GRIFFITHS and K. A. LOPARO 791

A realization approach to stochastic model reduction. U. B. DESAI, D. PAL and R. D. KIRKPATRICK 821

Incentive schemes using the follower's strategies in differential games. T. ISHIDA 839

Digital controllers for SISO systems: a review and a new algorithm. E. ZAFIRIOU and M. MORARI 855

PAGE

On the design of a sensitivity-reducing optimal dead-beat controller. M. GOPAL and P. P. NAIR 877

A design method for linear state feedback systems possessing integrity based on a solution of a Riccati-type equation. E. SHIMEMURA and M. FUJITA 887

The minimal order of rational transfer function realization from its z-domain samples. M. N. PRAKASH and A. T. FAM 901

Disturbance decoupling in decentralized linear systems by non-dynamic feedback of state or measurement. V. M. P. LEITE 913

Further aspects of disturbance decoupling in decentralized linear systems. V. M. P. LEITE 939

A self-tuning controller for systems with unknown or varying time delays. I.-L. CHIEN, D. E. SEBORG and D. A. MELLICHAMP 949

Correspondence

Comments on 'Decentralized control of linear dynamical systems via polynomial matrix methods: I. Two interconnected scalar systems and II. Arbitrary interconnected systems'. X.-K. XIE, H.-Y. JING and Y.-Z. TANG 965

NUMBER 5—NOVEMBER

Explicit strict sense state-space realizations of non-stationary processes. T. KAILATH and L. LJUNG 971

Harold Hazen and the theory and design of servomechanisms. S. BENNETT 989

Reduced-variance pole-assignment self-tuning regulation. M. B. ZARROP and M. FISCHER 1013

Multivariable self-tuning control: a model-following approach. S. BITTANTI and R. SCATTOLINI 1035
